

Features

- Automatic Voltage Regulation
- Single Phase (input/output)
- Servo-type Technology
- Wide input voltage range
- Analogical display
- Protection against over-voltages and overloads
- Output: terminals

GUARANTY 2 years

The Level PRO serie is a 7 500 to 30 000 VA automatic voltage regulator (AVR) range. Its servo technology, raises voltage during brownouts and reduces is during overvoltages. The mains' status and the AVR's behavior can be monitored through its analogical display. Thanks to its delay function, it can be used with devices using a compressor.
