

### The HOME and OFFICE choice

Mistral GreenA series are 600 to 1800 in-line UPS's offering the best protection for computers and peripherals. Designed for personal and professional use, they fit easily in any office environment thank to their small size. Their LCD screen constantly displays the input and output electrical line voltage as well as the load and charge level. It can communicate, through its USB port, with a management software (included) installed on the protected PC. This software can be used to monitor the UPS status but it can also save opened files, close running applications and shutdown the PC should a long power failure occur. Telephone, fax, or modem communications are protected against surge spikes through the RJ11 connectors.

Up to  
**20 min**  
Backup Time

### European Sockets

Compatible with plugs of the following type :  
French, German, Spanish etc

- **Voltage Regulation (AVR)**
- **LCD display**
- **Up to 20 minutes Backup Time**
- **Overheat Protection**
- **Cold Start (on battery)**
- **Automatic re-start**
- **Surge protection**
- **Tel./fax/modem/DSL protection (RJ11)**
- **USB communication**
- **Insurance 120 000 €\***
- **INCLUDED software**
